Berger Geosciences, LLC

is a new and innovative geophysical and geological analysis company organized to address the many geologic challenges faced in oil and gas exploration and production. Using advanced computer analysis and graphics technologies, our team of expert and experienced geologists can identify and resolve geologic issues that can significantly impact the costs of exploration and production projects. Our geologists work in tandem with client personnel to deliver the most cost-effective project results. Berger Geosciences should be part of your geoscience team.

Bill Berger
President

SHALLOW GEOHAZARD ASSESSMENTS

Our staff of geologists can assist you with necessary identification and reporting of shallow geohazards prior to drilling operations.

Our goal is to:

- **Ensure compliance with current government regulations**
- **Develop a geologic model of the project area**
- **Utilize proprietary and non-proprietary data**
- **Identify potential geologic hazards and constraints**
- **Provide client-specified deliverables**

Our unique approach ensures that the Shallow Geohazard Assessment meets or exceeds government regulations and client expectations.

From exploration to first-oil, we can be part of your geoscience team.

Our expertise is using all available data to build a comprehensive database.

We can provide client-defined information through the entire life-cycle of the project.

Whether it is planning surface locations, drilling the top-hole section, or planning field development, we are ready to help.

Be innovative,
